## Factor Analysis

Factor Analysis - Communalities - September 6, 2026

Communalities<sup>a</sup>

|          | Initial | Extraction |
|----------|---------|------------|
| VAR00001 | .515    | .999       |
| VAR00002 | .518    | .510       |
| VAR00003 | .343    | .487       |
| VAR00004 | .392    | .662       |
| VAR00005 | .303    | .432       |
| VAR00006 | .261    | .574       |
| VAR00007 | .547    | .556       |
| VAR00008 | .582    | .999       |
| VAR00009 | .417    | .520       |
| VAR00010 | .433    | .799       |
| VAR00011 | .116    | .087       |

Extraction Method: Maximum Likelihood.

a. One or more communality estimates greater than 1 were encountered during iterations. The resulting solution should be interpreted with caution.

## Factor Analysis

Factor Analysis - Total Variance Explained - September 6, 2026

Total Variance Explained

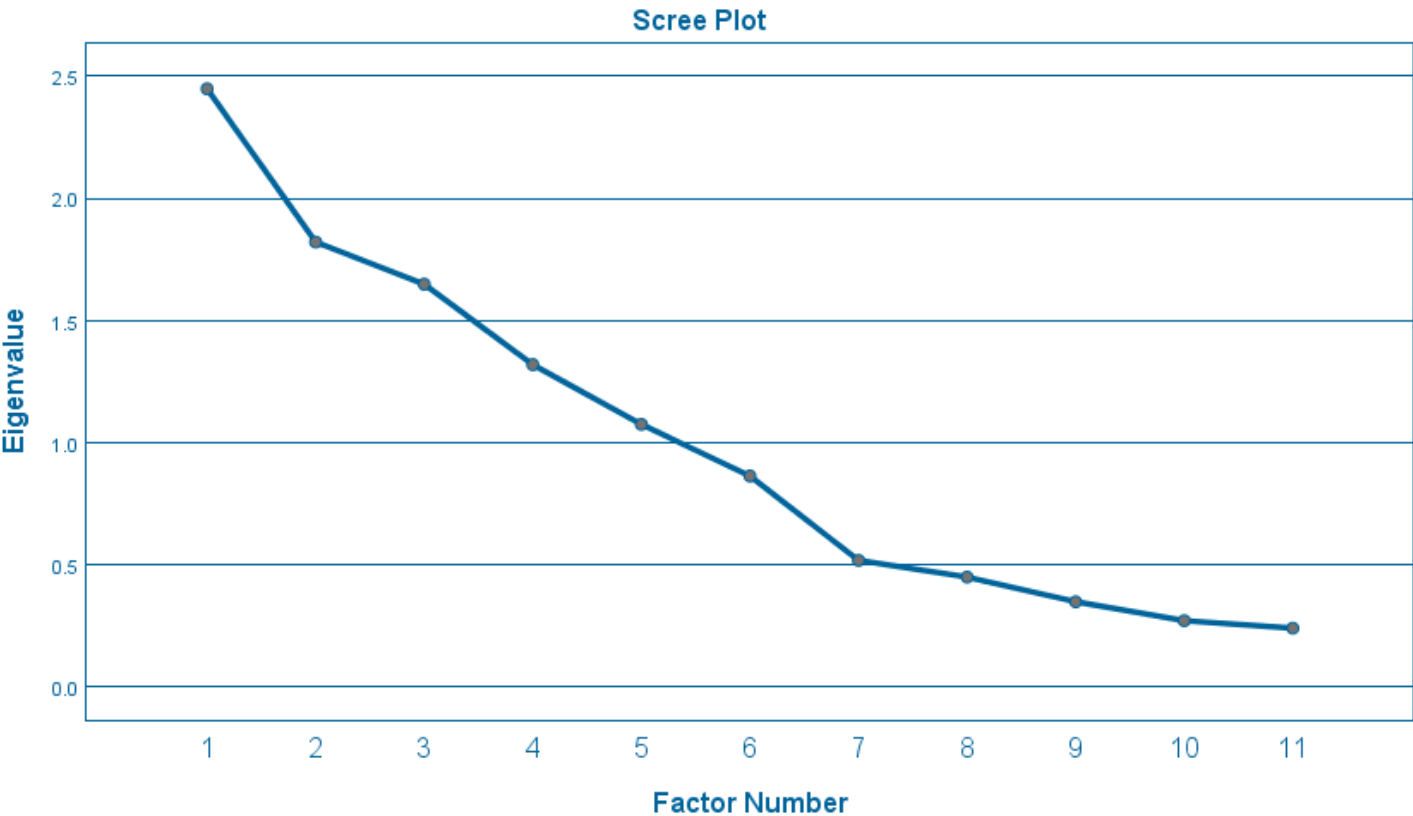

| Factor | Initial Eigenvalues |               |              | Extraction Sums of Squared Loadings |               |              | Rotation Sums of Squared Loadings |               |              |
|--------|---------------------|---------------|--------------|-------------------------------------|---------------|--------------|-----------------------------------|---------------|--------------|
|        | Total               | % of Variance | Cumulative % | Total                               | % of Variance | Cumulative % | Total                             | % of Variance | Cumulative % |
| 1      | 2.448               | 22.257        | 22.257       | 1.939                               | 17.624        | 17.624       | 1.581                             | 14.371        | 14.371       |
| 2      | 1.821               | 16.555        | 38.812       | 1.338                               | 12.163        | 29.787       | 1.517                             | 13.794        | 28.165       |
